

Song With No Name

**A song with no words
A song with no name
Don't know where it's going
Don't know what it's saying
But it sure feels fine
To play it anyway**

**Like the swallow she flies
Making her way
Fly long through the night
And long through the day
Though seas may divide
She'll make it home anyway**

**A song with no words
A song with no name
To lighten the load
And brighten the day
To soften the heart
Come what will come what may
A song with no words
A song with no name**

**Well the road has been long
And the way been unclear
And all of our time
Has been spent with our fears
And the weight of the world
Can be holding you down**

**But out of each night
Comes a new day
And out of each tear
A new wish on it's way
And out of each breath
This moment is here to stay**

Chorus
